CONCLUSION BASED ON DATA

Gross Profit (2023)
Rp 446.829.000

Gross Profit (2024)
Rp 491.716.950

Gross Profit (2025)
Rp 562.581.600

Gross Profit (2026)
Rp 631.378.481

Based on the data, our financial analysis highlights four key elements :

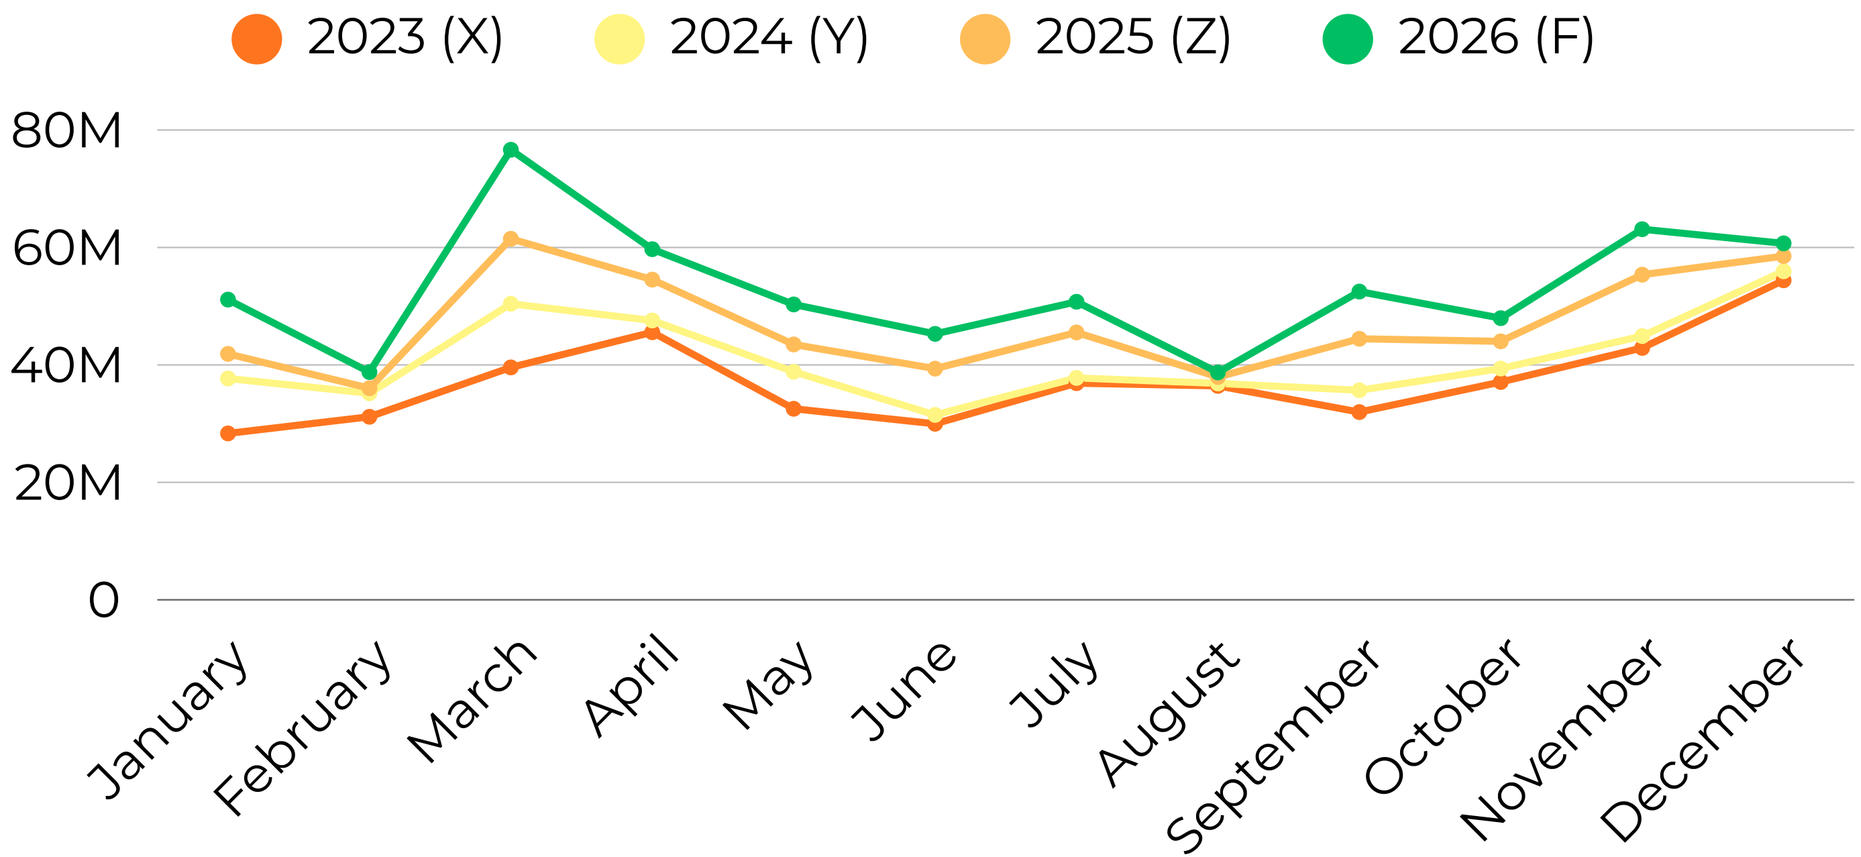

First, the incorporation of historical Gross Profit and Total Cost trends from 2023 through 2025.

Second, the establishment of our 2026 financial forecast.

Third, a detailed trajectory analysis based on YoY growth percentages.

Last, the identification of seasonal peaks—marked in green—representing the top three performing periods of each year.

GROSS PROFIT LINE CHART

Conclusion

Historical Gross Profit Growth (2023–2025)

Gross profit consistently increased, driven by higher quantity sold, although it was also influenced by rising total costs.

Total Cost Trajectory

Total costs showed steady historical increases from 2023 to 2025, but the 2026 forecast indicates a shifting percentage trend in total cost growth that requires close monitoring.

Forecasted 2026 Efficiency Check

Although nominal gross profit increases in 2026 (reaching Rp 631.378.481), the growth percentage declines to 12.23% (compared to 14.41% from 2024 to 2025), signaling a need to evaluate profit generation efficiency.

Next-Stage Financial Evaluation

Further comprehensive analysis—including net profit, cash flow, financial ratios, risk mitigation, and Time Value of Money (TVM) applications—is required to determine if the projected gross profit represents a truly safe financial threshold for the company.

Thank You So Much

This financial forecasting model utilizes historical sales data and Excel-based analysis to support data-driven financial decision-making.
